CPoS clarification for Interdisciplinary Certificates

Joey Derrick

- Undergraduate certificate programs at USC provide valuable skills and opportunities for students. However, these programs and their associated course are generally not eligible for Title IV federal financial aid.
- These programs are designed to enhance academic and professional development and offer students a competitive advantage. However, it is important to understand that undergraduate certificate programs do not meet Title IV eligibility requirements. As a result, courses taken solely to earn these certificates are not eligible for Title IX federal financial aid. Students should plan accordingly and are strongly advised to contact the Financial Aid Office to explore alternative funding courses or options for integrating these courses into a Title IV eligible degree program.
- Statement from website -
https://www.sc.edu/about/offices_and_divisions/advising/advisor_toolbox/advising_technology/degreeworks/cpos_info/index.php
- Title IV aid must be used toward a degree, but certificates do not count as a degree.
- So, if the courses only count for the certificate only, they won't count toward the aid
- Most students have more aid than Title IV which will pay for the course
- Very few students are encountering this as a problem
